1 SUMMARY OF COURSE

This course is an introductory course for a private pilot provided for people who desire to freely fly in the sky. You can learn what kind of study and trainings are required to be a private pilot through this course. This course is intended to assist time-restricted members of society in preparing for studying at a flight school in U. S. during their vacation to obtain the FAA private pilot License. We hope that this course will provide enjoyable and useful information for people dreaming of obtaining a pilot license or people who want to become an airline pilot in the future.

★ FAA

MEANING/PURPOSE

- The "FAA" is abbreviation for Federal Aviation Administration of U.S.
- The FAA is one of governmental agencies of U. S., which secures the safety of civil aviation.
- The FAA performs a wide range of activities for safety of the skies.

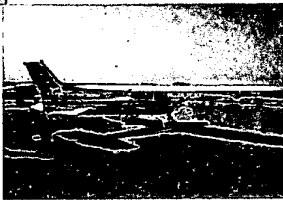

The right picture shows a control work being performed in a control tower, one of the works performed by the FAA.

2 CROSS-COUNTRY FLIGHT (CALIFORNIA)

Here, description will be made on the procedure at an airport first. Then, you can experience a cross-country flight for visiting two airports through a movie. The movie was filmed by courtesy of a flight school, SBIFA, which permitted us to accompany a cross-country instrument flight training.

★ CROSS-COUNTRY FLIGHT

MEANING / PURPOSE

- A cross-country flight is a long-distance flight with 50 NM (nautical miles) or more flight for one way.
- For a cross-country flight, an airplane takes off from and lands at airports different from an original departure airport.

NOTE / SUPPLEMENT

- A predetermined cross-country flight time is also required for obtaining a private pilot license.

ITEM TO BE LEARNED

- Please refer to each STEP of "Introductory Course for Private Pilot".
